

The 2025 ICD-10-CM codes have been updated and will take effect on October 1, 2024. These updates include 252 new codes, 36 deletions, and 13 revisions. The chart below reflects the newly added codes only.

What does this mean for your organization?

- Ensure your EMR system is updated with the new ICD-10-CM codes.
- Educate not only your providers but also your staff on these changes. Encourage providers to update patient problem lists with the new codes.
- When working on denials, pay close attention to the date of service – use the new codes only for dates on or after 10/1/2024. Applying new codes to earlier dates of service can lead to additional denials.
